

The Better 5th Wheel Hitch.

When you buy a new trailer, choose a hitch that protects your investment, and that provides the safety, comfort, and value you desire.

Only Super 5th hitches feature an automatically locking latch. Safer latch designs **eliminate truck and trailer damage, embarrassment, and hassles.**

The unique gear driven rotary latch closes, positively, and wraps 140° around the trailer king pin - leaving only .030" clearance between the king pin and latch. Tighter latch designs **minimize the "bump" felt while starting and stopping - and make towing more comfortable!**

Don't settle for less
- Demand More.

You'll be glad you did. Super 5th hitches offer RV'ers the best value for their money.
