SuperGlide - Short Bed Fifth Wheel Hitches

Call for application info when king pin is located behind front edge of trailer.

The 4100 & 4400 SuperGlide hitches have the option of using either Universal Mounting Kits with fixed base rails or SuperRail Kits, with custom designed mounting brackets and totally removable SuperRails and Mounting Posts.

The 3100 & 3600 SuperGlide hitch mounting kits all feature custom-designed mounting brackets and are totally removable.

The super short (less than 6') bed trucks are usually not recommended for fifth wheel towing, however, with some trailer limitations (e.g. king pin location & trailer width) the 3100 SuperGlide, may make towing possible. In cases where there will be less than 3" clearance between the cab and trailer, including a 90 degree turn, the 3100 is not recommended. SuperRail Mounting Brackets for the 3100 SuperGlide are only available for the trucks listed, there are no mounting brackets made to fit any other application. For specific vehicle/trailer combinations, call for additional information.
